PROGRAM OVERVIEW

1. Introduction

Welcome to the School of Electrical and Electronic Engineering (EEE) at the College of Engineering. We are honoured to have you join our esteemed academic community.

A comprehensive suite of Master of Science (M.Sc.) programmes is offered by the school, in both Full-Time and Part-Time formats, with the objective of facilitating the advancement of professional expertise and ensuring that graduates remain at the forefront of technological development in their respective fields.

The following M.Sc. programmes are available:

- Communications Engineering (CME)
- Computer Control & Automation (CCA)
- Electronics (ET)
- Power Engineering (PE)
- Signal Processing and Machine Learning (SPML)

Each programme has been carefully structured to provide rigorous academic training and practical competencies aligned with current industry and research needs.

Further information regarding the EEE M.Sc. programmes may be accessed via the EEE student intranet.

2. Course Structure

Most M.Sc. classes are scheduled in the evenings and follow a semester-based academic calendar. Each course comprises a total of 39 contact hours. Classes are conducted once a week, with each session lasting three hours. Final examinations are held during office hours at the conclusion of each semester.

The requirements for the M.Sc. degree include the following:

- Successful completion of a total of 30 Academic Units (AUs).
- Students are required to choose one of the following Study Options:

Option 1 **(Coursework Only)**	**Option 2** **(Coursework + Dissertation)**
a. 10 courses (3 AUs each, letter grades) b. 9 courses (3 AUs each, letter grades) + 1 Team Project (3 AUs, Pass / Fail grade) (Total: 30 AUs)	8 courses (3 AUs each, letter grades) + 1 dissertation project (6 AUs) (Total: 30 AUs)
• At least 4 specialized electives (≥ 12 AUs)	• At least 4 specialized electives (≥ 12 AUs)
• Not more than 6 general electives (≤ 18 AUs)	• Not more than 4 general electives (≤ 12 AUs)
	• Dissertation (= 6 AUs)

A minimum **Cumulative Grade Point Average (CGPA) of 2.5** is required for the completion of the programme of study. Please click here for detailed description of the Grade Point Average (GPA).

3. Candidature

Type of Programme	Minimum Candidature	Maximum Candidature
Full-Time	**1 year**	**3 years**
Part-Time	**2 years**	**4 years**

4. Option of Study

Students can choose to complete the programme of study by one of the following study options:

a) Coursework Only (C)
b) Coursework & Dissertation (CD)

Students should select their option of study through their GSLink during the Course Registration Period. The Student & Academic Services Department – Office of Academic Services (Graduate Education) [SASD-OAS (GE)] will notify students via NTU e-mail about the course registration period.

Once the option of study has been selected by students via GSLink, no further changes can be made in the system. Therefore, students are strongly advised to consider their choice carefully and, if necessary, consult their Dissertation Supervisors or Programme Directors prior to making a selection. Any subsequent change to the selected study option must be submitted via the Change of Study Option form, which is available on the MSc website

It is important to note that students intending to pursue the Coursework & Dissertation (CD) option should only indicate this choice after securing a dissertation allocation. If no option is selected during the course registration period, the system will default to the Coursework & Dissertation (CD) option. Students, especially those intending to pursue the Coursework Only (C) option, should be mindful of the timeline for indicating their choice, as this may affect course planning particularly during the selection of their final two courses. Students are strongly encouraged to review the recommended timeline and procedures provided by the MSc Programme Office to avoid confusion and registration issues.

For more information on the study options, please browse the following website:
https://entuedu.sharepoint.com/sites/Student/dept/sasd/oas/SitePages/Course%20Registration/option-of-study.aspx

a) Coursework Only Option

Under this study option, students are required to complete 30 Academic Units (AUs) through coursework. The coursework must include a minimum of four (4) Specialised Electives (SE) and up to six (6) General Electives (GE) courses. Each course carries a value of 3 AUs.

Students may fulfil the coursework requirement through one of the following pathways:
• Completion of 10 courses (each worth 3 AUs, assessed with letter grades).
• Completion of 9 courses (each worth 3 AUs, assessed with letter grades) and 1 Team Project (3 AUs, graded on a Pass/Fail basis).

b) Coursework & Dissertation Option

Under this study option, at least four (4) Specialised Electives (SE) and up to four (4) General Electives (GE) must be completed, with each course carrying 3 Academic Units (AUs). In addition, a project worth 6 AUs must be undertaken on an approved topic, which will lead to the submission of a dissertation to the Library (DR-NTU) after examination.

This option is recommended only for students who are considering to further studies at the PhD level, a career in Research and Development (R&D), or roles where the completion of a dissertation would be beneficial.

Please note that approval to undertake the dissertation is not automatically granted. It is subject to availability and the approval of a faculty supervisor.

Students who choose the Coursework & Dissertation option may require additional time to complete the programme.

5. Change of Study Option

Students who wish to change their study option from "Coursework & Dissertation" to "Coursework Only" or vice versa after making their selection on GSLink during the course registration period are required to seek approval from the Dissertation Supervisor and/or Programme Director. Such requests must be submitted via the online "Change Option of Study" form, which can be accessed through the EEE Student Intranet.

6. Courses Offered in Academic Year 2025-2026 Semester 2

Detailed information regarding course registration may be accessed at:
https://entuedu.sharepoint.com/sites/Student/dept/sasd/oas/SitePages/Course%20Registration/registration-schedule.aspx

For a brief overview of the courses offered, please visit:
https://wis.ntu.edu.sg/pls/webexe88/pgr$query_subject_content.display?in_acad=

Please choose from the list below to access the course offerings for each specific programme:

MSc (Communications Engineering)

MSc (Computer Control & Automation)

MSc (Electronics)

MSc (Power Engineering)

MSc (Signal Processing and Machine Learning)

Academic Matters

7. Course Registration

All students are required to register for their courses independently via GSLink. Typically, there are two course registration periods in both Semester 1 and Semester 2.

For Semester 1, the first registration period takes place prior to the start of the semester and is intended for existing students. The second registration period (also known as the Add/Drop period) begins in the first week of teaching and is open to all students.

During these two periods, students are permitted to add or drop courses as needed.

Students can retrieve the timeline for course registration at https://entuedu.sharepoint.com/sites/Student/dept/sasd/oas/SitePages/Course%20Registration/registration-schedule.aspx. Students are expected to follow the timeline strictly as no extension will be allowed.

Students are reminded to ensure that there are no clashes in their examination schedules before proceeding with course registration.

Course registration must be completed by each student individually. Attendance in a course without proper registration is not permitted. Students who attend classes without registering for the course will not be allowed to sit for the examination, or in the case of courses without formal examinations, no grade will be awarded.

The Course Registration website provided below may be referred to for further details: https://entuedu.sharepoint.com/sites/Student/dept/sasd/oas/SitePages/Course%20Registration/main.aspx

8. No. of Courses Registered Per Semester

The maximum number of courses that a student can take in any semester is 5 for full-time students and 3 for part-time students.

The minimum number of courses that a student can take in any semester is 2 for both full-time students and part-time students, unless the remaining course is the last course to graduate.

Student Type	Minimum Number of Courses to Register Per Semester	Maximum Number of Courses to Register Per Semester
Full-Time	2	5
Part-Time	2	3

9. Academic Calendar 2025/2026

Academic calendar accessible at https://www.ntu.edu.sg/docs/default-source/office-of-academic-services/ntu-academic-calendar-ay2025-26-(semester).pdf?sfvrsn=48419a20_1

10. Semester Time - Table

The detailed class timetable for the current semester can be accessed on the following webpage:https://wish.wis.ntu.edu.sg/pls/webexe/pgr$subrs_timetable.mmenu

11. Continuous Assessments (CA)

Continuous Assessments (CAs) form part of the overall course assessment, with the remainder based on the written examination. The format and components of CAs are determined by the respective course instructors and may include assignments, quizzes, and/or tests.

All students should take all forms of CAs seriously and submit all assigned coursework punctually. The weightage of CAs for each course can be found in the course list for the respective programme.

Students should not miss any CA components, as absence without an approved Leave of Absence will result in zero marks being awarded for the missed assessment.

12. Examination

Students who have registered for a course are required to sit for the written examination associated with it. In the event of absence from the examination, the student will be considered to have attempted and failed the examination.

Examinations are typically conducted between Week 14 and Week 16 of each semester. Students will be notified via their NTU email account approximately two weeks before the examination period to review and verify the examination details for their registered courses. A response is not required unless the student wishes to dispute the eligibility information provided.

It is essential that students keep their personal particulars, including postal address and contact number, updated through GSLink and email MSc Programme Office at eee_msc@ntu.edu.sg.

12.1 Illness

If a student is unwell and unable to sit for an examination:

You must see a Singapore-registered medical practitioner and obtain a valid Medical Certificate (MC). The MC must clearly indicate:

- Date of consultation (must be the date you visited the doctor)
- Coverage of the examination date(s)
- Doctor's name and signature (Digital MCs must display the doctor's name. "Locum" is not a doctor's name.)
- **Backdated or postdated MCs will NOT be accepted.**

Only MCs issued in Singapore by doctors registered with the Singapore Medical Council (SMC) or the Singapore Dental Council (SDC) are recognised. MCs must be submitted within three (3) calendar days of the missed examination through the online Medical Certificate (MC) / Compassionate Leave (CL) Submission Application. Submissions via email will not be accepted.

Upon successful submission, students will receive an email confirmation (OAS will be copied). Please keep a screenshot of this confirmation as proof of submission. Due consideration cannot be expected from the Board of Examiners if the MC is not received on time.

Students must indicate in the online form the exact MC period, affected examination(s), and upload the corresponding MC. A separate submission is required for each MC issued.

COVID-19 protocols are no longer applicable. ART photos or results will **NOT** be accepted as proof of illness.

12.2 Absence

If you have registered for a course but fail to take the examination, you shall be deemed to have failed the course unless the Board of Examiners concerned is satisfied that there is good and sufficient reason for your absence from the examination.

If a student is not able to take an exam and would like the Board of Examiners to give special consideration, a write-in to appeal with supporting documents must be submitted **within three (3) calendar days** from the date of absence from the examination. **Late submission will not be considered.**

Make-up or supplementary examinations will not be arranged for any reason. Student who misses the examination must retake the entire course in a future semester when it is offered. Normal course fees will apply for the repeated course.

For more information about the Examination, please visit the following website:
https://entuedu.sharepoint.com/sites/Student/dept/sasd/oas/SitePages/Examination%20and%20Assessment/examination_and_assessment.aspx

13. Registration of Calculators

All calculators used during examinations must bear an approved seal issued by the School of EEE or another engineering school.

Students will be informed of the calculator registration schedule by the EEE MSc Programme Office. For more information on calculator registration, please refer to the following link: Calculator Registration

14. Grade Point Average (GPA) System

Please click here for details on the GPA System.

15. Graduation Requirements

To graduate, students must complete the required Specialised Elective (SE) and General Elective (GE) courses in accordance with the programme curriculum. In addition, they must fulfil a minimum of 30 Academic Units (AUs) and attain a minimum Cumulative Grade Point Average (CGPA) of 2.5. All graduation requirements must be completed within the maximum permitted candidature period.

16. Academic Warning

Coursework students whose academic performance falls below a CGPA or TGPA of 2.5 will be issued an Academic Warning (AW) letter by the school. Students receiving such a letter are strongly advised to consult their Programme Director to review their study plan before the next course registration period begins.

17. Termination of Candidature

The candidature of coursework students will be terminated if their Term Grade Point Average (TGPA) falls below 2.5 for two consecutive terms of study. An appeal for re-admission may be submitted; however, approval is subject to the decision of the School's Management.

Dissertation Project

18. Dissertation Project

Students are allowed to view, select and apply the dissertation project via the online MSc Dissertation Management System (DMS). Students can only access the MSc DMS after they have enrolled in the programme officially. Kindly note that dissertation is not guaranteed as it is subject to the limited vacancies and supervisor approval.

Students are required to access the MSc Dissertation Management System (DMS) via their NTU email account (the same account used to access NTU resources). Students will need to grant permission for the system to access Office 365, SharePoint and Outlook Mail.

Important Date:
Announcement of dissertation project list: **Monday, 05 January 2026**
Deadline for selection of the dissertation topics: **Wednesday, 14 January 2026**
Deadline for submission of dissertation for examination (If students wish to join the 2027 convocation): 8 **October 2026**

Dissertation projects will NOT be allocated to students after the second semester of candidature.

Students who plan to complete their coursework components after AY 2026-2027 Semester 1 examination and wish to confer their degree in end January 2027 must adhere closely to the above-mentioned submission deadlines for dissertation examination.

Students whose dissertations require major or further study amendments might not be able to confer in January 2027. Refer to pointer 21.

Application for dissertation extension is mandatory if students cannot complete their dissertation within the minimum dissertation working period

Full-Time (Part-time) students who are unable to submit their dissertations within 2 years (4) semesters after the project allocation are required to are required to communicate with their supervisors and apply for extension of dissertation. Application for dissertation extension is approved on a case-by-case basis.

Students are not allowed to work on dissertation projects outside of Singapore.

Guidelines for Writing Dissertation:

The Dissertation must meet international standards in terms of quality. It should be written in good English and in the third-person pronouns.

Students are advised to refer to Appendix C: Standard Format for MSc Dissertation.

Length

There is no prescribed length to the dissertation. A good guide would be around 60 to 100 pages including main texts, charts, diagrams, appendices, tables, references, etc. One's own words must be used, and direct copying from books, technical reports, etc., is not allowed. The Standard International Units (SI) should be used.

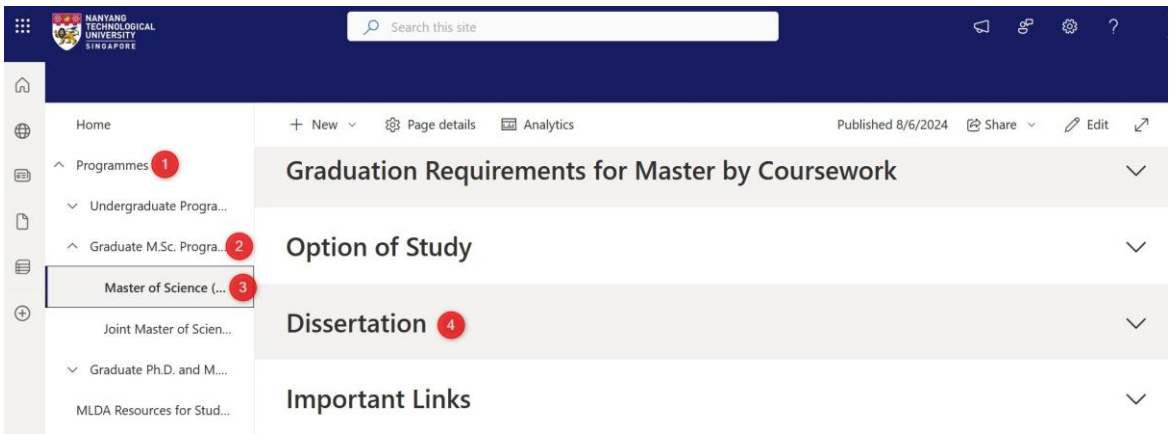
Style of Font (or Typeface) and Font Size

- Suggested Times New Roman, font size 12

Spacing

- One and a half line spacing should be used throughout the body of the text

The standard dissertation format prescribed by the School is given in Appendix C. To avoid any delay in obtaining approvals for dissertation submission, students are advised to adhere strictly to the sample provided. A set of the Dissertation Guidelines is also available on the EEE Student Intranet.



19. Important Note on Plagiarism and Academic Integrity

All students are hereby informed that plagiarism in all forms from open printed literature and public access domains (such as internet) is a **serious offence** in dissertation. All references to literature in public access domains must carry appropriate citations to the source of the information, and copying verbatim for such sources is strictly prohibited. In addition, all students are hereby informed that the School takes a serious view on infringement of copyright of published materials.

For more information on Academic integrity, please refer to the NTU **Academic Integrity Handbook**.

20. Submission of Dissertation for Examination

Students must attach the following items to the dissertation submission:

1. Softcopy of the dissertation (in a form ready for examination)
2. Similarity Report

***Important Note on the Similarity Report**
There are two types of similarity reports on NTU Learn. The students can choose one type based on the information in their dissertation.

Type of Candidature	Min Duration Working on Dissertation	Max Duration Working on Dissertation
Full-Time	1 year	2 years
Part-Time	2 years	3 years

- **Turnitin (for non-NDA dissertation)**, the dissertation that does not contain company confidential information. (It is in the EEE MSc Master Course site on NTU Learn.)
- **iThenticate (for NDA dissertation), the** dissertation that contains company confidential information.

For more information on dissertation submission process, please visit EEE Student Intranet.

21. Timeline for Dissertation Submission & Examination

The minimum and maximum duration to complete the Dissertation Project is as shown below:

The estimated timeline* for dissertation with respect to submission for examination is shown below.

Submission for Examination	Release of Dissertation Examination Outcome (estimated)	Submission of the Final Version (only applicable for No Revision or Minor Revision)	Graduation Date to be printed on the Degree Certificate	Collection of Degree Certificate and Official Transcript from One Stop @ SAC
Apr	Jun	Before End-Jun	End-Jul	Mid-Aug
May	Jul	Before End-Jul	End-Aug	Mid-Sep
Jun	Aug	Before End-Aug	End-Sep	Mid-Oct
Jul	Sep	Before End-Sep	End-Oct	Mid-Nov
Aug	Oct	Before End-Oct	End-Nov	Mid-Dec
Sep	Nov	Before End-Nov	End-Dec	Mid-Jan
Oct	Dec	Before End-Dec	End-Jan	Mid-Feb
Nov	Jan	Before End-Jan	End-Feb	Mid-Mar

Dec	Feb	Before End-Feb	End-Mar	Mid-Apr
Jan	Mar	Before End-Mar	End-Apr	Mid-May
Feb	Apr	Before End-Apr	End-May	Mid-Jun
Mar	May	3rd week-May	End-Jun	Mid-Jul

***Note:**

1. The above timeline is a rough estimation and is subject to changes without prior notice. It is intended to serve as a general guide and does not reflect the actual timeline.

2. Students are strongly encouraged to submit their dissertations for examination at least 4 months before their targeted graduation month to prevent potential delays or disappointments.

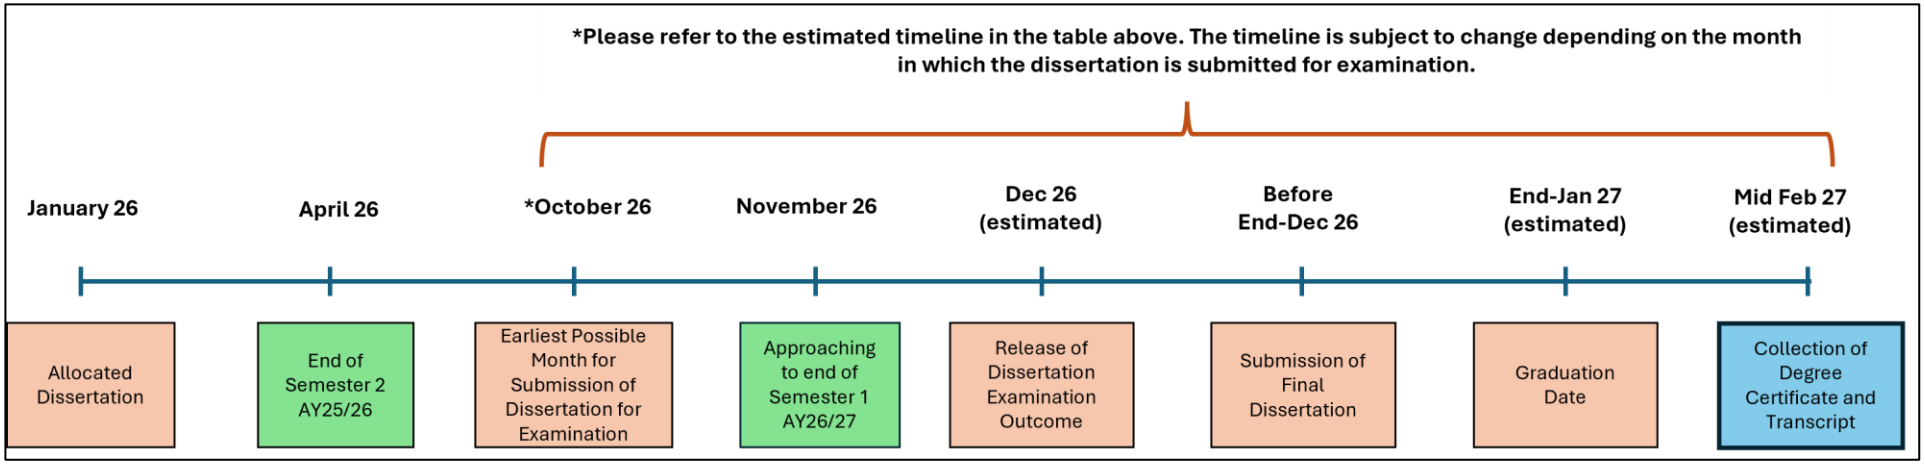
3. The process of degree conferment and the collection of degree certificate cannot be expedited. The above timeline should be used as a guide.

4. Full-time students who are unable to submit dissertation for examination within 1 year, please apply for extension of dissertation period. School of Electrical and Electronic Engineering (EEE) - Useful Form and Guidelines

22. Dissertation Timeline Illustration

Referring to both tables above, for a full-time M.Sc. student whose dissertation work is intended to commence in January 2026, the earliest possible submission for examination would be in October 2026 (at least 2 semesters). If all other coursework requirements have been fulfilled, graduation could be expected by the end of January 2027 (estimated).

Below is a sample estimated timeline, assuming a dissertation has been successfully allocated, and the student submits the dissertation in October 2026.



The maximum period refers to the period of working on dissertation (starting from the project allocated date) till one year before a candidate reaches his/her maximum candidature.

Full-Time (Part-time) students who are unable to submit their dissertations within 2 semesters (4 semesters) after the project allocation are required to request their supervisor to apply for extension of dissertation. The application for extension of dissertation period is available on the EEE Student Intranet. No dissertation extension is allowed beyond the maximum dissertation working period. Students who wish to attend the convocation in July of each year should plan to submit their dissertation by 1 March of that year, after fulfilling the minimum dissertation study period.To join the convocation[1] held in July of each year, he/she must have fulfilled and passed all requirements including uploading the soft copy of the dissertation (final version after the examination) to DR-NTU (Library Website)] by the stipulated deadline shown in the Dissertation Examination Process Flow above.

[1] Convocation is ceremonial. As soon as a candidate fulfils all the requirements of the MSc programme, the degree will be conferred by the Chancellor and the conferment date will be reflected in certification letter which can be obtained from the One Stop Online System.

Student Administration

23. Leave of Absence (LOA)

Students intending to apply for a Leave of Absence (LOA) must download the application form from the M.Sc. website. The form must clearly state the reason(s) for the request and include relevant supporting documents. LOA, if approved, will count towards the maximum candidature period, except in cases of Full-Term LOA, which refers to an absence spanning an entire semester or trimester. LOA applications will not be accepted after the coursework component has been completed.

LOA during the official University examination period (including Revision Week) will not be granted for students who are registered for courses in that term. Students who are not enrolled in any courses and are not working on their dissertation during a given term are required to apply for LOA.

Retrospective LOA applications—those submitted after the leave period has started or ended will not be accepted, except in cases of Compassionate, Outpatient Medical, Hospitalisation, or Maternity Leave. No tuition refund will be provided for such cases. Students on approved LOA are not permitted to attend classes, fulfil academic requirements, or work on or submit their dissertation during the leave period.

Students granted Full-Term LOA who have not attended any lessons beyond the first two weeks of the term will not be liable for tuition fees for their registered courses. However, an administrative fee of $54.50 per term will apply to maintain their enrolment. In contrast, students who have attended classes for more than two weeks will be liable for full tuition fees for all registered courses and the dissertation project (if applicable). If their application is submitted by the official withdrawal deadline, a “W” (Withdrawal) notation will be recorded for these courses, which will appear on their academic transcript.

Full-time international students granted Leave of Absence for more than one consecutive semester must cancel and surrender their Student's Pass as required by the Immigration & Checkpoints Authority (ICA). A new Student’s Pass must be applied for through the University at least one month before resuming studies.

Students will be notified of the outcome of their LOA application via their NTU email account. If the application is not supported by any of the approving officers, a rejection email will be sent. Students who are absent without an approved LOA will be deemed to have withdrawn from the University and will not be automatically eligible for readmission.

24. Tuition Fees

Tuition fees are reviewed annually and may be subject to revision. Information on current tuition fees and available financial assistance can be accessed at:
https://www.ntu.edu.sg/admissions/graduate/financialmatters/pgtuitionfees

Students who have attended lessons beyond the second week of the semester will be liable for the tuition fees associated with their registered courses.

25. Student Support System

Students are encouraged to seek advice and guidance on academic matters—such as course structure, course registration, and time management—from their respective Programme Directors.

A proactive approach is encouraged from both the Programme Director and the student to foster a positive and supportive relationship from the outset.

The **EEE Students Office** has been established to ensure that all EEE students have access to academic counselling and resources that support their overall wellbeing. Guidance can be provided on coursework expectations, academic prerequisites, and study strategies. This service plays a vital role in helping students succeed academically and has supported many in achieving their educational goals.

Contact information: Miss Chong Wei Ting (weiting.chong@ntu.edu.sg)
Website: https://www.ntu.edu.sg/eee/student-life/student-care-support

Students may also seek free professional and confidential counselling from the University Wellbeing Centre at the following address:

University Wellbeing Centre
Nanyang Technological University
#02-01, University Health Service
36 Nanyang Avenue
Singapore 639801
Tel: 6790 4462

Email: UWCstudents@ntu.edu.sg

A DISSERTATION SUBMITTED IN PARTIAL FULFILMENT OF
THE REQUIREMENTS FOR THE DEGREE OF
MASTER OF SCIENCE IN XXX (Programme Name)

202X
(Submission year)

Statement of Originality

I hereby certify that the work embodied in this thesis is the result of original research, is free of plagiarised materials, and has not been submitted for a higher degree to any other University or Institution.

Supervisor Declaration Statement

I have reviewed the content and presentation style of this thesis and declare it is free of plagiarism and of sufficient grammatical clarity to be examined. To the best of my knowledge, the research and writing are those of the candidate except as acknowledged in the Author Attribution Statement. I confirm that the investigations were conducted in accord with the ethics policies and integrity standards of Nanyang Technological University and that the research data are presented honestly and without prejudice.

Authorship Attribution Statement

Please select one of the following; *delete as appropriate:

*(A) This thesis **does not** contain any materials from papers published in peer-reviewed journals or from papers accepted at conferences in which I am listed as an author.

*(B) This thesis contains material from [x number] paper(s) published in the following peer-reviewed journal(s) / from papers accepted at conferences in which I am listed as an author.

Please amend the typical statements below to suit your circumstances if (B) is selected.

Chapter 4 is published as D.T. Murphy, S. Schmid, J.R. Hester, P.E.R. Blanchard, and W. Miiller. Coordination site disorder in spinel-type $LiMnTiO_4$. *Inorganic Chemistry* **54**, 4636-4643 (2015). DOI: 10.1021/ic502747p.

The contributions of the co-authors are as follows:

- A/Prof Schmid provided the initial project direction and edited the manuscript drafts.
- I prepared the manuscript drafts. The manuscript was revised by Dr Hester and Dr. Blanchard.
- I co-designed the study with A/Prof Siegbert Schmid and performed all the laboratory work at the School of Materials Science and Engineering and the Singapore Synchrotron Light Source. I also analyzed the data.
- All microscopy, including sample preparation, was conducted by me in the Facility for Analysis, Characterization, Testing and Simulation.
- Dr James Hester assisted in the collection of the neutron powder diffraction data.
- Dr Peter Blanchard assisted in the interpretation of the X-ray absorption spectroscopy data and carried out the spectral interpretation.
- Dr Wojciech Miiller assisted in the collection and provide guidance in the interpretation of the magnetic measurement data.

Chapter 5 is published as H. V Doan, B. Yao, Y. Fang, A. Sartbaeva, U. Hintermair, V. P Ting, Controlled Formation of Hierarchical Metal-Organic Frameworks using CO_2 Expanded Solvent Systems. In press, *ACS Sustainable Chemistry & Engineering* (2017). DOI: 10.1021/acssuschemeng.7b01429.

The contributions of the co-authors are as follows:

- Prof Ting suggested the materials area and edited the manuscript drafts.
- I wrote the drafts of the manuscript. The manuscript was revised together with Dr. Sartbaeva and Dr. Yao.
- I performed all the materials synthesis, collected X-ray diffraction patterns and visible light spectra, carried transmission electron microscopy, and conducted data evaluation.
- Dr. Y. Fang conducted the Rietveld analysis of the powder X-ray diffraction data and single crystal structure determinations.
- Dr U. Hintermair conducted the molecular dynamics simulations.
- Ms. A. Sartbaeva prepared the samples for electron microscopy.
